

## Pneumatic Rubber Fenders Ø1,0m x 2,0m L

### Features:

- High energy absorption with a low reaction force
- Adjust performance by varying internal pressure
- Low maintenance
- Suitable for areas with tidal difference
- Chain and tyre protection net for heavy duty use
- Chain, shackles and swivel joints are Q235
- Manufactured in accordance with ISO17357:2014

| Pneumatic Fender Ø1,0m x 2,0m L      |                     |
|--------------------------------------|---------------------|
| Out diameter(without tire)           | : 1000 mm           |
| Length                               | : 2000 mm           |
| Initial internal pressure            | : 50 kpa            |
| Testpressure                         | : 200 kPa           |
| Energyabsorption (at 60% deflection) | :45N-M              |
| Reactionforce (at 60% deflection)    | : 257kN             |
| Weight                               | : 225 kg            |
| Size include chain tire net          | : 1240mmD x 2215mmL |
| Warranty                             | : 6 months          |
| Certification                        | :ISO17357           |
